Proposed New Exploitation [REDACTED]

25X1B4D

1. As you can see by the attached memorandums of the Chiefs of my I/MM and I/TH Branches, I have given serious consideration to the tabulation [REDACTED] on the charts you left during your recent visit here.

25X1B4D

2. Their feeling is that the analysts could probably better exploit the specific information as required, rather than accumulate these plant studies such as you propose. There may be a need, however, for these tabulations in the respective plant folders in the Industrial Register.

3. I concur in the recommendations contained in the attached memorandum.
